Joliet, IL 60434

Gentlemen:

Fire-X Glasbord is acceptable as a ceiling and wall panel in federally inspected meat and poultry plants as long as the chemical composition remains as submitted to USDA on March 30, 1980. This acceptance is based on a review of the chemical constituents against appropriate FDA or USDA regulations or guidelines and the physical surface characteristics. Any change in formulation, label text, product or company name or address change without prior USDA acceptance renders this letter void. This does not constitute a USDA endorsement of the performance of this product.

Any unacceptable condition resulting from improper installation or maintenance will be cause for the inspector to require correction.

If assistance would be useful in making this decision, call Ron Anderson, Facilities, Equipment and Sanitation Division at Area Code (202) 720-7377.

Sincerely,

Ronald W. Anderson, P.E.  
Mechanical Engineer  
Facilities, Equipment and  
Sanitation Division  
Science and Technology
